Here are some suggestions:**

- * **Haunted History Tours** – Ghostly happenings on the Island? Some say...indeed. Cloaked tour guides escort "spirited guests" through the streets of Mackinac Island and frequently stop to tell an eerie tale of the Island's many specters and legends as well as the history behind each location.
- * **Maritime Museum** – Housed in an old observation tower, the museum is filled with educational information. There are four floors of exhibits on the themes of water, wind, waves, and wakes; shipwrecks of the Straits; building the Mighty Mac; and lighthouses of the Straits. Students will be thrilled by the view of the Island and Straits.
- * **Soo Locks Cruise** – Discover one of the great wonders of the world. It is the largest waterway traffic system on earth. Sault Ste. Marie is Michigan's oldest city, and your cruise will sail along its shoreline. The Soo Locks Tour is a two-hour live narrated boat excursion that actually takes our group through the Locks.
- * **Student Science Scavenger Hunts** - By identifying certain trees, rocks, and other items common to the Straits Area, your students will forge an in-person link to their studies. This is great way to take the classroom outdoors.
